

Worksheet for Language lecture

Draw the lateral view of the cerebral cortex and label Broca's and Wernicke's areas and answer the following questions:

- which lobe(s) does each area belong to?
- which side of the cortex are these areas located in most people?
- -what are the major characteristics of Broca's and Wernicke's aphasia?

What are the implications of the studies on the KE family in neurobiology of language and speech?
